

Assessing Boundaries and Building the Supervisory Relationship >>>

FREE: 6 IDFPR CEU for LSW/LCSW, LPC/LCPC, and Psychologist

The supervisor/supervisee relationship is a critical variable in the overall success of supervision. The responsibility for the quality of this relationship is weighted toward the supervisor. There are a number of factors that you will want to consider as you enter the role of supervisor.

This workshop looks at the theory and strategies that focus on the supervisor/supervisee relationship. It offers some specific examples of ways to enhance the relationship and presents issues representing good boundaries in supervision. Specific attention will be given to how the Covid-19 Pandemic has impacted supervision and the barriers sometimes created by telehealth and technology.
