

Teen Mental Health and Alcohol Use

FREE: 2 IDFPR CEU for LSW/LCSW, LPC/LCPC, Psychologist, and IAODAPCA (pending)

This presentation equips counselors and mental health professionals with advanced tools to address the complex relationship between teen mental health and alcohol use. Attendees will learn to assess dual diagnoses in adolescents using the DSM-5 and other methods, identify at least two ways alcohol use worsens mental health issues, and apply three key strategies for building rapport, creating effective treatment plans, and working with teens' support systems.

There is a change in presenters due to a family emergency.
